# Intana Employment Brank Labor Force Trends

A Quarterly Publication of the Montana Department of Labor and Industry's Research and Analysis Bureau

1st Quarter 1993

Volume 23, Number 1

#### **Economic Highlights & Employment Outlook**

Montana's first quarter 1993 Civilian Labor Force averaged 403,100 – showing a 1.6 percent decrease of 6,400 from the previous quarter, and a 2.1 percent decline of 8,600 from the first

quarter of 1992.

The total average Civilian Labor Force for calendar year 1992 was 412,000.

#### **Employment**

Montana's total average employment averaged 371,400 during the first quarter of 1993 - showing a substantial decrease of 12,500 from the preceding quarter, and a loss of 6,500 from first quarter 1992.

Total average employment for 1992 was 384,000.

#### Unemployment

The number of Montanans estimated to be unemployed for the quarter was 31,700-a seasonal increase of 6,100 over the previous quarter, and a decrease of 2,100 from the corresponding quarter of 1992. The average

rate of unemployment for the quarter was 7.9 percent - down slightly from first quarter 1992's

average rate of 8.2 percent.

#### Total Non-Agricultural Employment\*\*

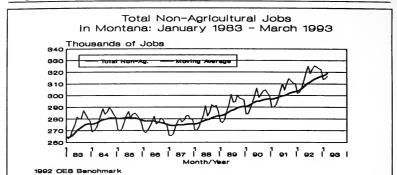

\*\* NOTE: Numbers may not total due to rounding.

First quarter non-agricultural wage-and-salary employment averaged 315,000 jobs-showing a normal seasonal decrease of about 8,200 jobs from the previous quarter. Total average employment, however, was 11,300 above the first quarter of 1992.

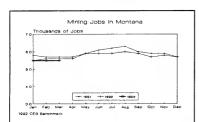

with the private sector adding

It's time to let us know if you want to keep receiving this publication. Please return the form on the inside back page of this issue to stay on our malling list.

10,500 jobs and government adding 800. All industry sectors reported job increases over the first quarter of 1992 except for TRANSPORTATION, COMMUNICATIONS & UTILITIES, which remained at the same level, and MINING, which was down 100 jobs. The increase in GOVERNMENT was primarily due to increases in state education and local government.

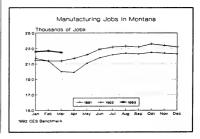

MINING averaged 5,500 jobs—down 200 from the previous quarter, and down 100 from the first quarter of 1992. Most of the job decline over the year was in oil & gas extraction. All other MINING sectors were near the same jobs level as last year.

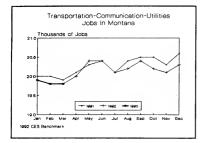

CONSTRUCTION jobs averaged 10,600—down 3,700 from the previous quarter, and up 400 over the first quarter of 1992. Most of the gain was in general building, with a slight gain in special trades. Heavy construction jobs were at the same level as last year.

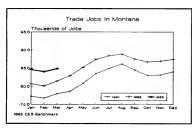

MANUFACTURING averaged 22,500 jobs for the quarter—a gain of 1,100 over the same period one year ago, but down 900 from the previous quarter. The gain over the previous year was in both durable and non-durable goods. Durable goods increased by 900 jobs, primarily in the lumber & wood products sector, which was 600 jobs richer than the first

quarter of 1992. Stone, clay, & glass increased by approximately 100 jobs. Non-durable goods showed a gain of 200 jobs over the year, primarily in printing & publishing.

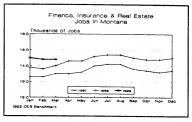

The number of jobs in TRANSPORTATION, CUMMUNICATIONS & UTILITIES (TCU) averaged 19,800 for the quarter-down 400 from the previous quarter, but at the same level as the corresponding quarter of 1992. In March 1993, however, railroad transportation showed about 100 more employees than in March 1992. Telephone communications and combination utilities each had 100 fewer employees than the previous March.

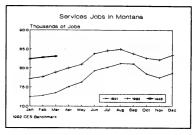

First quarter jobs in TRADE averaged 84,500 for the quarter – 2,500 below the previous quarter, and 3,800 above the first quarter of 1992. The increase over last year was due to a 3,500 jump in retail trade jobs plus a 300-job increase in wholesale trade. Retail trade's eating and drinking places increased by 1,600 jobs, general merchandise stores by 900, automotive dealers and gas stations by 400, miscellaneous retail by 100, and building materials stores by 100. Each of the other

retail trade sectors also showed gains of at least 100 jobs.

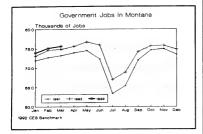

FINANCE, INSURANCE & REAL ESTATE (FIRE) averaged 14,400 jobs during the first quarter—staying at the same level as the preceding quarter, and improving on the first quarter of 1992 by 500 jobs. Finance gained 200 jobs, insurance added 100, and real estate grew by about 200. The only change in FIRE from February 1993 to March 1993 was a small decrease in insurance jobs.

SERVICES jobs averaged 82,800 — paralleling the fourth quarter, and exceededing the first quarter of 1992 by 4,900 jobs. Hotel & other lodging places dropped by about 300 jobs from the previous quarter, but showed an increase of 1,000 jobs over the first quarter of 1992. Amusement & recreation gained 400 over the previous quarter. Health services dropped by 200 jobs from the preceding quarter, but showed a sharp increase of 1,000 jobs over the first quarter of 1992. Social services was up 200 jobs from the previous quarter, and 300 from the year before. Membership organizations was up 200 jobs from

the previous quarter, and up 600 from the previous year.

GOVERNMENT averaged 74,900 jobs for the quarter – 500 fewer than the previous quarter, but 700 more than the corresponding quarter of last year. Over the year, state education and local government each increased by about 400 jobs.

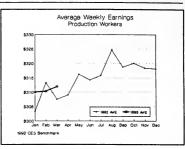

## Average Weekly Hours and Earnings

Average weekly earnings for the first quarter averaged \$310.81 - down \$8.08 from the previous quarter, but up \$2.77 over 1992's first quarter.

Average weekly hours for the quarter averaged 31.9—down 0.3 hours from the fourth quarter, and up 0.1 from the first quarter of last year.

Average hourly earnings during the first quarter averaged \$9.75 per hour. This compared with \$9.89 per hour the previous quarter, and \$9.68 per hour for the first quarter of 1992.

### **Highlights by Industry Components**

Agriculture

- Members of a Fairfield ranch family are manufacturing Dairy-Best brand cheeses that they package, pre-price and deliver fresh to retail outlets. One of only 2 cheese manufacturers in the state, the family uses milk from its own cows — and feeds the whey byproduct to its livestock.
- A group comprised largely of eastern Montana and western North Dakota farmers has purchased 4 Mon-Dak Farmers grain elevatorlocated in Fairview and Sidney, Montana and Alexander and Arnegard, North Dakota. And, in another grain elevator change, Harvest States Cooperatives has taken over operation of the Farmers Grain Exchange elevator in Havre.

Mining

- ◆ASARCO Inc. is closing down its copper and silver mine near Troy in April and laying off the mine's 300 employees. An ASARCO spokesman says the shutdown is due to low metal prices, declining production due to low ore grade—and delays in permitting it's proposed Rock Creek mine, which was intended to replace the Troy mine. ASARCO did not say if the closure will be permanent.
- •Garrison's phosphate mine closed down in March, resulting in the permanent layoffs of 77 employees. Another 30 employees were laid off temporarily, and are expected to return to work at the mine's processing facility in May, according to a news release distributed by the company that owns the mine.
- ◆Zortman Mining Inc. wants to expand its mine south of Malta. It has proposed doubling its "disturbed acreage," building a new leach pad, and constructing a 2-mile conveyor system in order to extend the mine's life by an estimated 5 to 8 years. The Pegasus Gold Corp. subsidiary would extract sulfide and oxide ore from the walls and floors of existing open pits.
- Chevron USA Inc. and Manville Mining Co. are undergoing corporate restructuring to leave the Stillwater Mining Co. a stand alone company with a possible future as a publicly held company. Under the new setup, the platinum-

palladium mining operation will be a Delaware-based corporation registered to do business in Montana. Chevron and Manville will continue to equally own SMC's stock, and company headquarters will remain in Denver. Chevron and Manville spokesmen say expansion of the Stillwater Mining Co. mine near Nye will take priority over building a sister platinum-palladium mine south of Big Timber that is in the planning stage, and that the Nye mine expects to hire between 20 and 30 workers this year to help develop ore reserves.

•The Atlantic Richfield Co. plans to build an 18-hole golf course near Anaconda as part of its hazardous waste cleanup of the upper Clark Fork River basin. Arco will plan and build the course, a spokesman says, that will then be turned over to the county.

#### Construction

•Construction is moving along on a new Indian Health Service hospital south of Crow Agency. The 24-bed hospital will replace the old IHS hospital, a spokesman says, and should be completed by the end of the year. Construction workers are also renovating the former Sun Lodge motel and restaurant into an office building—and are converting the former Big Horn Carpet Mill building into a casino.

#### Manufacturing

•The Columbia Falls Aluminum Co. has reduced production and laid off workers because of a reduction in the amount of electricity available to the aluminum reduction plant. The plant has been operating at approximately 75-percent capacity since the beginning of the year because some of the power normally supplied to the plant has been needed instead to fill the power requirements of residences and businesses in the area. A spokesman says that the plant's work force of nearly 700 has been reduced by 88 workers, but that he hopes "conditions will change quickly so that full operation can be restored and our employees can be returned to work." The Bonneville Power Administration attributes its lower power supplies to drought conditions that have affected hydroelectric dam levels in the Northwest.

- Louisiana-Pacific Corp.'s plant in Missoula has been running 7 days a week, 24 hours a day, according to a company spokesman, in order to keep up with the demand for its woodgrain printed particleboard. The plant takes raw particleboard, puts a grain print on it, and sells it for making shelving, desks, cabinets and other furniture products. Twenty-eight jobs were added at the plant during 1992 when plant production was doubled.
- •The work force at a lumber mill in Belgrade has been reduced by about a third since Louisianna-Pacific Corp. bought the mill from Plum Creek Timber Co. last July. A mill spokesman says the transition to new ownership "is pretty much in place," with the mill concentrating on making 2-by-4 and 2-by-6 studs for the domestic market.
- •A metals recycling company from Washington that tried unsuccessfully to relocate to Missoula late in 1991 now wants to set up business near Baker. Ross Electric's building permit was rescinded by the city of Missoula when it was discovered that the company planned to burn electrical transformers that contained PCBs.
- •A small Kalispell company has developed a kind of aerial photography that produces computer screen images that can be analyzed for information using computer technology. The president of Positive Systems Inc. says his company's technology is being used around the United States in a wide range of applications, many of which deal with environmental monitoring. Images are being used, he said, to study ocean vegetation, wetland restoration, power plant water runoff, soil characteristics, and forest tree inventories.
- Burlington Resources Inc. has sold its interest in Plum Creek Timber Co. to SPO Partners & Co., a private investment company based in San Francisco. A spokesman for Burlington Resources says selling interest in Plum Creek was "close to the final step" in divesting Burlington Resources of non oil and gas businesses.
- Conoco has bought half-interest in a fertilizer plant that produces an ammonium thiosulfate agricultural fertilizer from the Billings Conoco refinery's waste gases. Kerley Inc. sold half-interest in its business in order to recap some

- money, a Kerley spokesman says. Conoco now has operating control at the plant.
- •S&K Electronics and TAMSCO have joined together to pursue new contracts in the manufacturing and engineering fields. S&K Electronics is a subsidiary of the Confederated Salish and Kootenai Tribes, based in Pablo. Technical and Management Services Corp. (TAMSCO) is a minority-owned company based in Maryland with a branch assembly plant in Polson.
- •A vinyl-window manufacturer has moved its manufacturing operation from Calgary, Alberta to Great Falls, where it is building custom windows with vinyl frames for a market area that includes Montana, the Dakotas and northern Idaho, as well as the 3 western Canadian provinces. Artic Window plans to hire 6 workers initially, its president says, and grow to a work force of about 18 later in the year.

## Transportation, Communications & Utilities

- •US West has announced that its toll operator office in Billings will be closed this fall, eliminating the jobs of 85 employees. A US West spokesman says the decision to consolidate toll operator services was in response to a continuing decline in operator-assisted calls. Calls formerly handled by the Billings office will be handled by offices in Waterloo, lowa; Fargo, N.D.; and White Bear Lake, Minn. Laid-off employees will be able to apply for openings elsewhere in the company.
- ◆US West has put 59 Montana telephone exchanges up for sale. The company will sell only to financially sound parties, a spokesman says, and will require buyers to upgrade switching systems by the end of 1995. If the company finds suitable buyers for the exchanges, the sales could be completed by later in the year. All sales must be approved by the Federal Communications Commission. US West will continue to operate any exchanges that don't sell. Most of the 59 exchanges serve small to medium-size Montana communities.
- Pacific Northwest Cellular has purchased Cellular One operations in Billings and other Montana communities. Based in Bellevue, Wash., Pacific Northwest Cellular is the nation's eighth-largest independent cellular

telephone company. It will continue to conduct business in Montana under the Cellular One Name.

#### **Retail Trade**

- •Sears, Roebuck & Co. has announced its decision to discontinue catalog sales nationwide, resulting in the termination of all Sears catalog franchises in Montana. A company spokesman says small retail appliance stores are planned for Bozeman, Helena and Kalispell. Sear's retail department stores in Billings, Great Falls and Missoula will also remain open.
- A Circle K spokesman says his company has been very successful in selling Montana Circle K stores that remained unsold after an auction held in November. He says that he expects all 29 Montana stores will have been sold by the end of March.
- Target Stores has announced plans to open a store in Missoula. A spokesman says she anticipates a March 1994 opening.
- Wal-Mart has plans to build 2 more stores in Montana - one in Bozeman, and the other in Missoula. Company spokesmen estimate that the Bozeman store will open this fall, and the Missoula store will open during the summer of 1994.

#### Finance, Insurance & Real Estate

 The Bank of Montana System has acquired the 12-bank Montana Bancsystem. The combined systems include 29 locations in 25 Montana cities.

- Hysham National Bank has become a branch of Farmers State Bank of Worden. Spokesmen for the merged banks say the merger will result in reduced expenses and streamlined operations.
- •Kalispell-based Montana Medical Benefit Plan has been licensed to provide health insurance to individuals and companies in Montana. Montana Medical Benefit Plan joins Blue Cross-Blue Shield of Montana as one of only 2 in-state, nonprofit health insurance companies in Montana.

#### Services

 Montana Deaconess Medical Center in Great Falls laid off about 100 workers in February. with a handful of those laid off subsequently being rehired to fill positions opened up through an early retirement offer. A hospital spokesman says declining admissions, the prospect of major health care reform and a need to streamline operations necessitated the layoffs.

#### Government

 The U.S. Forest Service has announced its intention to cut 200 jobs in its Northern Region by the end of fiscal year 1993. A spokesman says 100 jobs have already been eliminated through attrition, and that he expects the other 100 job cuts will come through attrition also. The work force downsizing comes as a result of the Northern Region's sharply-curtailed timber program, he says.

Prevailing Wage Rates* Established for Alien Certification												
Occupation	DOT Code**	Wage Rate	Date Set	Area								
Parts Manager	185.167.038	\$ 8.46 per Hour	03/17/93	Statewide								
Assistant Professor	090.227-010	\$ 25,958.00 per Year	04/06/93	Eastern Montana College ONLY								
Sheepherder	410.687-022	\$ 700.00 per Month Plus Room & Board	04/07/93	Statewide								

These rates are not the official prevailing wage rates that must be used for public works contracts. Those wage rates may be obtained from the Montana Dept. of Labor & Industry's Employment Relations Division or a local Job Service office.

\*\* U.S. Department of Labor Dictionary of Occupational Titles job description code number.

#### Benchmarking

Data included in this publication reflects the current benchmarks for the Nonagricultural Wage & Salary Employment series and the Labor Force series. The annual tables at the back of this publication also reflect these benchmarks.

A benchmark is a point of reference from which measurement can be made, or upon which adjustments are based. The 2 series mentioned above are estimated differently:

(1) Non-agricultural wage-and-salary employment is estimated from a carefully-constructed sample survey of firms of different sizes within each industrial classification. Some error is inherent with any sample survey, however, because only a selected number of firms is surveyed. This limitation is the primary reason for benchmarking this series.

In periods of expansion, employment levels tend to be underestimated—and, in periods of decline, employment levels tend to be overestimated. This is primarily due to new firm "births" and "deaths"—meaning newly-created businesses and those that have gone out of business.

The benchmarking process for non-agricultural wage-and-salary employment examines only the preceding 2 years of data. It corrects any errors in adjusting for new firms—and it also adjusts for improvements in the quality of data and any updating of industrial classifications.

(2) Labor force data is derived from a monthly sample of households conducted by the Bureau of Census for the U.S. Department of Labor. Known as the Current Population Survey (CPS), this data is designed to be statistically significant on a monthly basis for the nation. States with small populations, however, do not have a large enough sample to ensure reliability on a monthly basis. This is the main reason for benchmarking the labor force series in Montana.

The labor force series also includes the benchmarked non-agricultural wage-and-salary employment by industry in its benchmarking process. Revisions to the labor force series is normally limited to the preceding 3 years. Occasionally, a longer benchmark is warranted. For instance, the labor force series is normally revised for the previous 6 years after a Census is done.

If a more detailed explanation of the benchmarking process is needed, please feel free to contact the Research and Analysis Bureau.

THE CONSUMER PRICE INDEX (CPI) IS A MEASURE OF THE AVERAGE CHANGE IN THE PRICES PAID BY URBAN CONSUMERS FOR A FIXED MARKET BASKET OF GOODS AND SERVICES. THE CPI IS CALCULATED MONTHLY FOR TWO POPULATION GROUPS, ONE CONSISTING ONLY OF THE URBAN HOUSEHOLDS WHOSE PRIMARY SOURCE OF INCOME IS DERIVED FROM THE EMPLOYMENT OF WAGE EARNERS AND CLERICAL WORKERS (CPI-W). AS NEW USES WERE DEVELOPED FOR THE CPI IN RECENT YEARS, THE NEED FOR A BROADER AND MORE REPRESENTATIVE INDEX BECAME APPARENT. THE ALL-URBAN CONSUMER INDEX (CPI-U), INTRODUCED IN 1978, IS REPRESENTATIVE OF THE 1982-84 BUYING HABITS OF ABOUT 80% OF THE NONINSTITUTIONAL POPULATION, COMPARED WITH 25% REPRESENTED IN CPI-W.

"THE STANDARD BOTH A REPRODUCED BY THE MONTANA DEPARTMENT OF LABOR AND INDUSTRY FOR USE AS STATE ECONOMIC INDICATORS SOURCE FOR DATA SEE TECHNICAL NOTE S 4 ON TRAIL PAGE.

## Total Nonagricultural Wage and Salary Employment Seasonal Adjustments

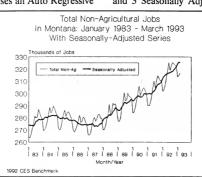

The 3 components of a time series are the Trend Cycle, Seasonal Cycle and Irregular Fluctuations. Irregular Fluctuations, in theory, will average out to zero over a long time series. Therefore, if the Seasonal Cycle can be removed, the long-term movement – or Trend Cycle — can be analyzed.

The Current Employment Statistics (CES) seasonal adjustment uses an Auto Regressive

Integrated Moving Average (ARIMA), or basically a centered moving average, to filter out the Seasonal Cycle. A prior adjustment is made to any Irregular Fluctuation that exceeds 1.0 percent. The X-11 method extrapolates 1 year of unadiusted data and uses that to calculate factors which extend the original series. The extending factors can be either additive or multiplicative, depending on how the seasonal fluctuations affect the original series. They are used to adjust the extended Trend Cycle to what the expected Unadjusted Series would be.

We are currently producing 10 Seasonally Adjusted series with these extending factors, and 3 Seasonally Adjusted aggregate series

that don't have factors. To use the published factors to change the Unadjusted Series to a Seasonally Adjusted series, the inverse operation must be used-either dividing by Multiplicative Factors or subtracting Additive Factors. Refer to the following tables through page 38 for specifics.

## **GLOSSARY OF TERMS**

- Civilian Labor Force-The number of persons 16 years and older, defined as employed or unemployed, excluding members of the armed forces.
- 2.) Employed-Those persons who work for pay or profit during a week or, as unpaid family workers, work 15 hours or more during a week. Also included as employed are those who although not working had some job attachment and were not looking for work, including persons temporarily absent from a job due to illness, bad weather, vacation, or labor dispute, whether or not they were in a pay status during their time off.
- 3.) Unemployed-Those persons who, for an entire week, did not work at all, were able to work and available for work, and (1) were looking for work or (2) would have looked for work except that (a) they were waiting to return to a job from which they had been laid off, or (b) they were waiting to report to a new wage and salary job scheduled to start within the following 30 days (and were not in school during the week).
- 4.) Unemployed Rate-The number of unemployed expressed as a percent of the civilian labor force.
- 5.) Residence Data-A count of people by where people live.
- 6.) Establishment Data-A count of jobs by where people work.
- 7.) Seasonally Adjusted Labor Force Series-To facilitate the evaluation of labor force, recurrent yearly movements have been isolated and removed using the X-11 ARIMA method of seasonal adjustment. This is the same method used by the Bureau of labor Statistics to seasonally adjust the national labor force series.
- 8.) MSA-Metropolitan Statistical Area as determined by the Office of Management and Budget. The MSA must have a central city with a population of 50,000 or more.
- 9.) LFA-Labor Force Area as determined by the Research and Analysis Bureau, Montana Department of Labor and Industry, consists of a central city or cities with a population of less than 50,000 and the economically integrated geographical area surrounding it.
- 10.) SDA-The Job Training Partnership Act (JTPA) was established to replace CETA in job search, placement, relocation, and especially training assistance. Each state designs local plans for JTPA programs through a Private Industry Council (PIC). Each PIC jurisdiction is known as a Service Delivery Area (SDA). The two SDA's for Montana are known as Rural CEP (Beaverhead, Broadwater, Deer Lodge, Granite, Jefferson, Lewis & Clark, Madison, Meagher, Powell, and Silver Bow counties) and Balance of State (the other 46 counties).
- 11.) Benchmarking-A continuous process of establishing a new set of data which affects the series of estimates through revision. Once a new benchmark is established, the adjustments to estimates between the new benchmark and the preceding one are carried forward progressively to the current month by use of sample or secondary data. In the case of employment data, the benchmark is used to establish the level of employment, while the sample is primarily used to measure the month-to-month changes in the level.
- 12.) <u>CES-790 Program-The Current Employment Statistics survey produces monthly estimates of a wide variety of employment and earnings information for the nation and each state.</u>

## Reliability of CES Estimates

The relatively large size of the CES 790 sample (see table below) assures a high degree of accuracy, but the CES estimates may differ from a complete count. A link relative technique is used to estimate employment. This requires the use of the previous month's estimate as a base in computing the current month's estimate. Thus errors may accumulate over several months, To remove the error in the estimates, the CES is adjusted annually to a new benchmark. The base of the benchmark is the 202, which is a complete count of all employees who are covered by Montana unemployment insurance laws. The 202 is adjusted for employees who are not covered by the state's unemployment insurance laws through the use of special surveys of that noncovered employment. The benchmark revision also adjusts the estimates for changes in industrial classification of individual establishments. The following table presents the amount and percent revision of All Employees at the most recent benchmark for major industry divisions.

> Benchmark Evaluation of ALL EMPLOYEES For Major Industry Divisions in Montana

Women Workers, Production Workers, and Hours and Earnings estimates are not subject to benchmark revisions at the estimating cell level because there is no universe count available. These categories are entirely sample based. The broader groupings may be affected by changes in employment weights as the cells are reaggregated during benchmarking.

## Montana's Labor Force Areas

## **SOURCES OF DATA**

- S-1.) Prepared by the Montana Department of Labor and Industry's Research and Analysis Bureau in cooperation with the U.S. Department of Labor's Bureau of Labor Statistics (BLS). LAUS data (Local Area Unemployment Statistics program) is adjusted to the Current Population Survey benchmark and is the official BLS approved series that is used to allocate federal funds and determine eligibility for federal assistance programs. This series represents employment and unemployment by place of residence, and is not comparable to the place-of-work industry employment series (CES data). LAUS data is calculated for the week that includes the 12th of the month. Workers involved in labor disputes are counted as employed. Total employment in the labor force also includes agricultural workers, unpaid family workers, domestic workers and the self-employed.
- S-2.) Prepared by the Montana Department of Labor and Industry's Research and Analysis Bureau. The unadjusted unemployment rate is prepared by the LAUS program in cooperation with the U.S. Department of Labor's Bureau of Labor Statistics. The seasonally adjusted rate is an unofficial series, and is provided only for use as a state economic indicator.
- S-3.) Prepared by the Montana Department of Labor and Industry's Research and Analysis Bureau from LAUS data. Data for Congressional Districts, Service Delivery Areas and Labor Force Areas is calculated from the official data series by summing up employment and unemployment for the appropriate counties involved, and calculating an unemployment rate from the summed data for each area.
- S-4.) Prepared by the Montana Department of Labor and Industry's Research and Analysis Bureau in cooperation with the U.S. Department of Labor's Bureau of Labor Statistics. Data from the CES (Current Employment Statistics) program represents employment by place-of-work, and covers full-time and part-time employees who worked during, or received pay for, the payroll period that includes the 12th of the month. The data excludes the self-employed, volunteers, unpaid family workers and domestic workers. Persons on sick leave, vacations, or holidays (and being paid for that period by their employer) are considered employed. Payroll and worker-hour data is collected for production and related workers in manufacturing industries, non-supervisory workers in private service-producing industries, and construction workers in construction industries. The earnings figures are "gross" figures that is, they reflect changes in wage rates, shift differentials and premium pay for overtime work. The hours figures relate to the hours for which pay was received, which is different from scheduled or standard work hours.
- S-5.) Prepared by the Montana Department of Labor and Industry's Research and Analysis Bureau from a survey of Business Establishments as part of the BLS 790 Program. Information on Women Workers is computed as a ratio of All Employees of the Current Employment Statistics, and is produced for informational purposes only.
- S-6.) Tabulations produced by the U.S. Department of Labor's Bureau of Labor Statistics, and reprinted by the Montana Department of Labor and Industry's Research and Analysis Bureau for informational purposes only. This is a national data series because Montana data is not computed separately.
